Institute of Public Administration Chooses Intelligo's Corporate Payroll Software – MegaPay

Background

The Institute of Public Administration (IPA) is the Irish national centre for development of best practice in public administration and public management.

Their training and education programmes are tailored to the needs of public servants. Their research and publishing services offer an informed voice and forum for discussion and debate on public service issues.

With over 100 staff in two locations in Ireland managing the payroll requirements efficiently was a priority for the Institute of Public Administration's payroll department.

Changing Payroll Software

In 2007, the Institute of Public Administration tendered for and installed a new payroll system. The existing payroll system lacked flexibility to import data and produce the bespoke management reports that are considered crucial for the management of its business.

This seriously constrained the availability of accurate management data and good quality business analysis.

Introducing MegaPay

The IPA chose MegaPay for its payroll software as it met all of their requirements. The functionality within the application standardises and automates payroll processes, reduces staff administration and makes

essential management information readily available. A number of key determinants behind the decision included MegaPay's cost effectiveness, simplicity of installation, timely taxation updates and integration into FMS.

Improving Administration

The IPA's payroll administration team concluded that Intelligo's MegaPay offered the most appropriate solution for their needs and improved administration efficiencies allowing staff to focus on strategy issues instead.

The Institute's Director of Finance and Information Systems, Cyril Sullivan stated that MegaPay has supported many of the Institutes financial objectives.

"The MegaPay software is easy to use, imports are straight forward to run and the support from the staff at Intelligo is excellent, they are very professional without exception.

This makes the whole payroll process a great deal more efficient and ultimately, the real beneficiary is the IPA".

Working with Intelligo

"A number of key determinants behind the decision included MegaPay's cost effectiveness, simplicity of installation, timely taxation updates, integration into FMS and the elimination of the use of payroll stationery."

“ *The Institute of Public Administration, Ireland's only education, training and consultancy service focused exclusively on public sector development, has chosen Intelligo's leading corporate payroll software – MegaPay.* **”**

Cyril Sullivan, Director of Finance and IS, IPA

- 1** MegaPay is Ireland's No. 1 choice for the Corporate and Public Sector.
