## McAfee Ireland Limited Chooses Intelligo's UK Payroll Software, Megapay, to manage their UK Payrolls.

"We chose Intelligo's UK payroll software, Megapay, over the other UK Payroll solutions in the marketplace as we needed a payroll provider who could support both UK and Irish Payroll legislation."

**Claire Grant, Payroll Manager EMEA, McAfee.**

### Background

McAfee is the world's largest dedicated security technology company. McAfee protects consumers and businesses of all sizes from the latest malware and emerging online threats.

McAfee's solutions are designed to work together, integrating antimalware, antispyware, and antivirus software with security management features that deliver unsurpassed real-time visibility and analytics, reduce risk, ensure compliance, improve internet security, and help businesses achieve operational efficiencies.

Backed by an award-winning research team, McAfee security technologies use a unique, predictive capability that is powered by McAfee Global Threat Intelligence - enabling home users and businesses to stay one step ahead of online threats.

The shared service centre, based in Cork, processes 24 payrolls across 23 different countries including 1 Irish payroll and 2 UK Payrolls with a total of 421 staff on the UK Payrolls.

### Choosing The Right System

According to Claire Grant, Payroll Manager EMEA at McAfee, "We looked at other payroll providers in the UK, but needed a payroll provider who could support both UK & Irish legislation. Excellent customer support, flexibility and ease of use were our main criteria."

### Addressing Their Needs

"We did a projected cost analysis over 5 years and Megapay costings compared really well to well known market leaders. As Megapay is very easy to use, we have reduced our payroll processing times by at least a half day each, per payroll run, for our 2 UK payrolls & our Irish payroll."

Claire added "The standard Megapay reports are very comprehensive & meet most of our needs, any additional reporting requirements are more than adequately met by Megapay's Report Writer (standard with Megapay unlike other Payroll Providers whose report writer is an add-on)."

### Improving Efficiency

To receive information from HM Revenue and Customs, McAfee were using EDI which is old technology & can be quite cumbersome. Now everything is a quick download through Megapay without even having to logon to HMRC.

In addition, Megapay does all the calculations for McAfee. The key features of Megapay for McAfee's payroll department are:

- Data uploads to Megapay are very easy, just a couple of clicks & our data is validated.
- If a mistake is made, it is very easy to back out.
- Ease & flexibility of use.
- System navigation is simple.
- HMRC interface.
- All time saving features!

"As Megapay is very easy to use, we have reduced our payroll processing times by at least a half day each per payroll run for our 2 UK payrolls & our Irish payroll".
