MEGA PAY

Payroll Management System

Pension specialists for the construction sector.

CPAS uses Intelligo's corporate payroll software Megapay, to manage the Pension Administration Payroll for 8,000+ Pensioners in the Construction Industry.

"The software works very well, but like any partnership, the after sales support is also just as important. We have found the support given by the Megapay team to be excellent and it gives me great confidence going forward that we have made the right move."

Denis Cadogan, IT Manager, CPAS.

Background

CIF Pensions Administration Services Ltd, trading as CPAS, was established in 2006 to provide professional pension administration services to the pension schemes of the Construction and Related Industries.

CPAS provides Administration and Trustee Services to two large industry wide, master trust arrangements for the construction sector, namely The Construction Workers Pension Scheme and Construction Executive Retirement Savings. In addition, they administer two large pension payrolls for over 8,000+ Pensioners.

Choosing Megapay

According to Denis Cadogan, IT Manger for CPAS, *"We chose Megapay over the other payroll software solutions in the market as we wanted a well-established payroll system that could handle large employee payrolls. Megapay had a great reputation and excellent support team and project management team.*

Our old system was unstable and needed lots of attention which took time. With such large payrolls going out every month to the public, it needed to be right first time. Megapay has never let us down!"

Benefits of Megapay

Denis added *"Megapay just works! We never have any issues and when we do want to make a change, or need support, the helpdesk team are excellent and fast to respond. The difference is night and day!"*

It gives me great confidence going forward that we made the right move in choosing Megapay over the other corporate payroll systems on the market."

Features of Megapay

According to Denis, the key features of Megapay are:

- Corporate Payroll system that can handle large complex payroll requirements.
- Exceptional Project Management that never lets down.
- Excellent Helpdesk team that inspires confidence.
- Enables the payroll process to perform on time, everytime.
